ROBERT M. GORDON, DDS, AND JAY A. MILLER, DDS • GENERAL DENTISTRY

A commitment to using the very latest technology has served Dr. Robert Gordon and Dr. Jay Miller quite well throughout 27 years of practice together. “We never wanted to be the guys who graduate from dental school and practice the same way the rest of our lives,” says Dr. Gordon. “We always want to be on the front end of the best dentistry available.”

At their state-of-the-art dental office located directly across from CentraState Medical Center, they provide a level of technology that sets their practice apart from others. Both doctors are Invisalign® Premier Providers and use computer-guided implant surgery that allows them to take patients through that process from beginning to end, yielding fantastic results. The practice has two CEREC® computers that can be used to design and fabricate one-day porcelain crowns and onlays. Digital radiography (X-rays), DIAGNOdent (a computer-assisted cavity detector), and the Odyssey® diode laser for gum treatments are also used.

Dr. Gordon and Dr. Miller, both graduates of the University of Maryland Baltimore College of Dental Surgery, are joined in the practice by Dr. Liza DiMedio.

The doctors are very proud of their experienced staff. “We may have been named Top Dentists, but they are half the story of our practice,” says Dr. Miller. “This honor reflects their hard work as well.”

Underlying everything the doctors do is a great respect for the patient’s time. “It’s very rare that anyone has to wait for an appointment,” says Dr. Gordon. “We take our appointment schedules very seriously.”
